Morgan's HumiKelp

HumicBlaster and Seaweed Extract

RATE OF APPLICATION

IN-FURROW

Corn, Soybeans, Wheat: 2 qts/ac with 3 to 5 gals of solution.

WITH NITROGEN

All: 1/2 to 2 gals/ac with 5 to 20 gals of solution.

GROUND

All: 1/2 to 2 gals/ac with 5 to 20 gals of solution.

TRANSPLANT

All: 1 to 2 gals/100 gals Transplant Solution.

FERTIGATION

All: 2 to 4 qts/ac. Repeat every 14 days.

FOLIAR

All: 1 to 4 qts/ac with herbicides, insecticides, and fertilizers.

For best coverage, recommend applying with a minimum of 10 gallons spray solution per acre. To ensure good uptake of nutrients when applying foliar, recommend not applying during the heat of the day nor in very high or very low humidity conditions.

*These are general product recommendations. Please consult with your Morgan Composting agronomist for specific fertility recommendations.

*Conduct a jar test before mixing with pesticides and other fertilizers to confirm physical compatibility.

*Protect from freezing.

*Shake well before use.

ACTIVE INGREDIENTS

Humic Acid	5.1%
From Leonardite and Potassium Hydroxide	
Seaweed Extract	2.5%
