Standard Soil Health Test: The Haney Test*; covers organic carbon/nitrogen ratio, and weak acid extractable nutrients.
Advanced Biological Test: Analysis of the living microbial biomass, identifying presence or absence of functional groups.
Solvita CO_2 Respiration Test: Tests for microbial activity by measuring CO2 respiration, indicating estimated N release.

Please send at least one pint of soil for each sample
Basic Nutrient Test (acid extration): Cation Exchange Capacity (CEC), Base Saturation, pH, Organic Matter, Sulfur, Phosphate (Mehlich III), Calcium, Magnesium, Potassium, Sodium, Trace%, H%, Boron, Iron, Manganese, Copper, Zinc and Aluminum
Saturated Paste Test (water extraction): pH, Soluble Salts, Chloride, Bicarbonate, Sulfur, Phosphorus, Calcium ppm & %, Magnesium ppm & %, Potassium ppm & %, Sodium ppm & %, Boron, Iron, Manganese, Copper, Zinc and Aluminum
*The Haney Test: uses chemical and biological soil test data designed to mimic nature's approach to soil nutrient availability as best we can in the lab.

√ IF Organic	Sample ID	Previous Crop	Current Crop	Number of acres eg 20A	<- - - Basic Tests - - -> Basic Nutrient Test - $35	Saturated Paste Test - $40	Molybdenum & Cobalt - $20	Nitrate - $6	pH only - $5	Conductivity - $10	<-Biotest-> Standard Soil Health Test - $70	Advanced Biological Test - $80	Solvita CO_2 Respiration - $20	Other _____ - (Inquire)
					√ which test(s) desired									

Special Instructions: _____
