

Create a RAISED BED with

Raised beds are a great way to avoid weeding and simplify your gardening experience!

You'll Need:

-Finished Structure for Your Garden - this could be elevated to any height and made of whatever materials you'd like.

- Shovel
- Topsoil Blend
- Newspapers
- FlowerDoo 201** or **VeggieDoo 301**
- Plant Transplants
- Water

Step 1

Start filling your structure with a base of **DAIRY DOO'S Topsoil Blend**. Continue filling and spreading the **Topsoil Blend** evenly across the structure until you are about 6-8 inches from the top of the bed.

Step 2

Unfold your newspapers and spread them across the top of the **Topsoil Blend**. Be sure to cover all of the soil. Wet the top of the newspapers thoroughly.

**Note - if you are using a very shallow structure steps 1 and 2 can be omitted.*

Step 3

Fill and level the remaining 6-8 inches of your raised bed with **FlowerDoo 201** or **VeggieDoo 301**, depending on what you will be planting in the raised bed. Both are organic, weed free, and full of the nutrients your plants need! **FlowerDoo 201** is great for all types of flowers and **VeggieDoo 301** is great for all of your fruits and vegetables.

FlowerDoo 201 or VeggieDoo 301
(top 6"-8")

Newspapers

Topsoil Blend

Step 5 (Optional)

If you are wanting to start some of your plants from seeds, dig a trench in the **FlowerDoo 201** or **VeggieDoo 301**. Fill the trench with **Seed Starter 101** and plant your seeds according to their package. Top with more **Seed Starter 101**. This will help your seeds to germinate and then provide additional nutrients to them as they out-grow their trench.

Step 4

Follow the instructions for your plant transplants to dig holes the appropriate distance apart. Add your transplants and fill the hole back up with your soil. Water very thoroughly. Check the amount by digging 1-2 inches into the soil at a corner of the bed. If the soil is still dry, continue to water the whole bed.

Be sure to water your plants throughout the summer and enjoy the harvest!
